## JORDEN BOULET

| Biography                  | Born in 1990 in Hasselt, BE<br>Jorden Boulet resides and works in Hasselt, Belgium.<br>Jorden Boulet is a contemporary painter best known for his project-oriented practice with a constant reference to the<br>idea of paradise. White beaches, palm trees, or a beautiful sunset evoke an atmosphere of happiness, joy, perfection,<br>or freedom. However, Boulet's paradisiacal world comes with a twist, as it is an ambiguous illusion with Kitsch,<br>decadence, and superficiality, but also elusiveness and melancholy lurking just around the corner.<br>From a visual point of view, the Belgian painter distinguishes himself with a bold and extreme use of color.<br>However, Jorden Boulet himself is color blind, experiencing reality and the process of painting differently, resulting<br>in unique contrasts and confident brushstrokes. A recurring motif throughout his oeuvre is a characteristic and<br>abstract écriture of deceivingly random marks or scribbles on top of the picture. These marks seem to breach the<br>illusion of the paradise, as they emphasize the distance between the viewer and the depicted paradise. |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
